

**MEETING OF THE  
PARKS & OPEN SPACE ADVISORY COMMITTEE  
BOULDER COUNTY, COLORADO  
AGENDA**

**Thursday, January 23, 2025, 6:30 p.m.**

**Third Floor Hearing Room**

**County Court House**

**1325 Pearl Street, Boulder**

Boulder County wants to ensure that everyone has equal access to our programs, activities, and services. To request an Americans with Disability Act (ADA) accommodation, please email [ada@bouldercounty.gov](mailto:ada@bouldercounty.gov), or call 303-441-1386. Submit your request as early as possible, and no later than two business days before the event. Please see the [Accessibility Statement](#) for full details.

---

- 1. Call to Order**
- 2. Roll Call**
- 3. Election of Officers**
- 4. Approval of Last Month's Minutes**
- 5. Presentations**
  - 5.1 2024 Closings Summary**  
Staff Presenter: Janis Whisman, Real Estate Division Manager  
  
**Action Requested: Information Only**
  - 5.2 White-Nose Syndrome in Bats in Boulder County: BCPOS Response and Internal Management**  
Staff Presenter: Susan Spaulding, Environmental Resources Sr. Specialist  
  
**Action Requested: Information Only**
- 6. Public Comment Period for Items Not on Agenda**
- 7. POSAC Members Comment Period for Items Not on Agenda**
- 8. Director's Update**
- 9. Adjournment**

**MEETING OF THE PARKS & OPEN SPACE ADVISORY COMMITTEE**

**BOULDER COUNTY, COLORADO**

**Regular Meeting Minutes**

**December 19, 2024, 6:30 p.m.**

**Third Floor Hearing Room**

**County Court House**

**1325 Pearl Street, Boulder**

Members Present: Janet George  
Trace Baker  
Paula Fitzgerald  
Drew Adams  
Kristine Johnson

Members Excused: Tony Lewis  
Jackson Moller  
Derek Turner  
Carol Byerly

**Boulder County aims to ensure all digital content and documents are accessible. While efforts have been made to maximize accessibility, some types of content have inherent technical limitations. See the [Accessibility Statement](#) to learn more.**

---

1. **Call to Order**
2. **Roll Call**

3. **Approval of Last Month's Minutes**

4. **Presentations**

4.1 **2024 Restoration Review**

Staff Presenter: David Hirt; Resource Program Supervisor, Restoration/Plant Ecology

**Action Requested: Information Only**

Q: What is the current designation on the DeBerry property?

Response: The current designation is MOA (Multiple-Objective Area). There are still prairie dogs, but it's a lower density.

Q: It seems like several large-scale disturbances exist that BCPOS needs to correct. What is your capacity to fulfill your seed needs in house?

Response: We have a seed collection program with volunteers that is pretty robust, and we have a seed garden. We also use outside growers in eastern Washington. Many of our projects are small enough to use seed that we collect. The seeding project of 80 acres at Rock Creek Farm was a large project that required seed from outside producers.

Public Comment:

None

4.2 **Plans for Parks & Open Space 50th Anniversary Celebration in 2025**

Staff Presenters: Liz Northrup and Tina Nielsen

**Action Requested: Information Only**

Q: That other media outreach is being planned?

Response: We do plan to include radio ads - including Spanish language stations, and bus ads.

Public Comments:

Linda Parks, Boulder. She had an issue that the stamps designed represent bike riders because bikes represent active use. She would like the stamps to show wildlife and more passive use of our parks.

Staff Response: The Boulder County program does define bike use on our trails as passive recreation.

4.3 Video Celebration of Parks & Open Space 2024 Accomplishments

Staff Presenter: Mike Lohr, Buildings & Historic Preservation

**Action Requested: Information Only**

5. Public Comment Period for Items Not on Agenda

Carmen Porter, Boulder County. She keeps horses and she is Boulder County House Assn. She spoke against canceling the public indoor riding arena at the fairgrounds. She asked POSAC to reconsider their earlier approval.

Cindy Johnson, Boulder. She also spoke in favor of reinstating the public indoor riding arena.

Deborah Kinnett, Longmont. She asked that the the open ride at the fairgrounds. be reinstated.

Carson Sander-Ferracane, Boulder County. He spoke about the youth in the area that enjoyed using the indoor arena to exercise their horses and connect with other equestrians.

Pam Andringa, Boulder County. She works in the healthcare profession and the opportunity to use the riding arena in the winter is important for kids.

Staff Response:

Joe LaFollette, Fairgrounds Manager. He clarified that no 4-H events were cancelled. The reasons for closing the open ride arena were fiscal and that his staff doesn't have the ability to maintain the arena for that particular use. On average, only about 10 visitors used the arena during the Wednesday open rides. Many different groups have a desire the use the fairgrounds, but they cannot accommodate all of them. Joe feels that they

did their due diligence to reach the public before the final decision was made, which included several public meetings.

**6. POSAC Members Comment Period for Items Not on Agenda**

Kristine Johnson commented on the public input that came before. She urges staff to be creative in how they engage with the public around these issues. It would have been beneficial to hear comments like these from the public at the time of the hearings. She also had questions related to the Weed Management Plan approval.

Staff Response: We are preparing an update on the IWMP approval and plans for the annual reports and will present that to POSAC. We've asked three experts to evaluate our continued use of Indaziflam and we will also report those results soon.

Paula Fitzgerald asked that staff involved in the public process regarding the Fairgrounds decision see if any lessons can be learned and if outreach can be improved upon.

Drew Adams: Where were the gaps in the outreach regarding the Fairgrounds Manual Update and cancelling the open ride? He also asks for the exact costs of keeping the arena open for riders.

Response:

Joe: I don't have the exact numbers in front of me, but the arena seats about 1,500 people, with restrooms and two different types of heat. To do the needed work in the arena, we use approximately 1600 gallons of water and use a tractor to level the ground and make it safe. We need staff working 12-hr days. The arena needs to be prepared for multiple events Friday and Sunday with staff sometimes working late at night to get it ready for the public sessions. The average amount of revenue generated for the open ride season \$1,547 or \$5.37/hour to operate the arena. This is far less than what it costs to keep it open. In addition, our staff can't be available for these smaller activities (equestrian and dog events). When the arena is almost constantly in use, we aren't able to keep up the needed maintenance.

Therese: Several things come into play in deciding where the county spends money. Recently the county did an equity budgeting assessment. We were given direction to put the information from that assessment into practice, including increasing fees at the fairgrounds to cover costs and to look at who we are serving. When only 10 users come in for a 12-hour day, that is not serving a broad enough community to justify the costs. Open space sales tax money cannot be used to support the fairgrounds and there is a lot of competition from other departments for county funds.

## 7. Director's Update

- A contractor has been selected for Prairie Run to work on stream restoration, the west side parking lot, and trail design and constructions.
- The Soil Revolution conference was Thursday Dec. 12, sponsored by Boulder County, City of Boulder, and NRCS,
- Today we were notified we were awarded a \$3M FEMA grant for Prince Lake #2, to protect many residents in Erie from potential flooding from this important agricultural reservoir.
- BCPOS Budget: four positions were approved:
  - IT Tech
  - Weed Tech
  - Community Engagement Specialist
  - Fairgrounds Bilingual Tech
- The new outdoor shelter at Parks & Open Space headquarters is complete. It can be reserved for use by county staff, BCPOS volunteers, and the public.
- Cardinal Mill: staff is working with two contractors. One is monitoring water and proposing a filtering solution; the second is looking at how to stop the issue at the source with new technology.
- We are partnering with NOCO Places on mapping illegal trails by using cell phone data to help determine locations. BCPOS and partnering agencies will be working on closing and restoring the most critical of these.

## 8. Adjournment

8:31 p.m.

This is only a summary of the meeting. The meeting video is viewable on the [POSAC webpage](#).

## PARKS & OPEN SPACE ADVISORY COMMITTEE MEETING

Time/Date of Meeting: 6:30 p.m., Thursday, January 23, 2025

**TO:** Parks & Open Space Advisory Committee  
**FROM:** Janis Whisman, Real Estate Division Manager  
**AGENDA ITEM:** 2024 Closing Summary (Real Estate Division Annual Report)  
**ACTION REQUESTED:** Information Only

---

*For much longer than Parks & Open Space's history of stewarding open space, the land in this community has been important to the diverse Indigenous communities that continue to thrive here. We are partnering with Indigenous people to make meaningful changes to how we do our work that include Indigenous people, incorporate their perspectives, and honor their land stewardship legacy. Parks & Open Space operates within modern legal constructs of land ownership to steward Boulder County open space and accomplish these efforts on behalf of our community.*

This memo summarizes the Real Estate Division's 2024 accomplishments. I look forward to presenting this information at your meeting and answering any questions you may have.

### Acquisitions

At any given time, the Real Estate Division is working with willing landowners on approximately 100 potential acquisition projects, including new acquisitions and conservation easement amendments.

In 2024, Boulder County invested a net of \$11,938,646 for 645.74 acres. The county completed 15 acquisitions: 10 fee properties, two conservation easements, two conservation easement amendments, and one water-only acquisition. The county acquired 9.182 shares of priority agricultural water rights in the Bonus, Highland, Left Hand, Palmerton, and Rough and Ready ditches. The year's most significant acquisitions were:

- Haystack Mountain: The county purchased this 106-acre property at a live online auction. The county paid \$6.2M and received the land and mineral rights, along with 31 shares of Left Hand Ditch, 31 shares of Reformed New Hinman Ditch, and an 85/160 share of Holland Ditch. The property contains the Haystack Mountain Natural Landmark and is closed to the public.
- Cottonwood: The county acquired this 102-acre property on the north side of Highway 66 west of Hygiene. The property contains Agricultural Lands of Statewide Importance and Preble's meadow jumping mouse (PMJM) Suitable Contiguous Habitat (Zone 3). It is also marked as part of the View Protection Corridor and the property is part of the Rabbit Mountain Environmental Conservation Area, the Rabbit Mountain Natural Landmark, and the Rabbit Mountain High Biodiversity Area having a B1 rating for Outstanding High Biodiversity Significance. The property is primarily irrigated agricultural land and came with substantial priority water rights, including 1 share of the Highland Ditch, 3.475 shares of the Palmerton Ditch, and 0.1 share of the Rough & Ready Ditch.

## Dispositions

At any given time, the Real Estate Division is working on about 30 disposition projects. Most open space dispositions are due to temporary and permanent takings by entities with condemnation power over the county because they need land for roads and utilities.

In 2024, Boulder County received \$2,354 in proceeds from four dispositions. Describing these four illustrates the fact that takings typically have a small impact on county open space:

- Alexander Dawson: The United Power Company took a small area (0.15 of an acre) for its power line needs on the north end of the property west of Highway 287. United Power had condemnation authority over the county to take the land and the county was paid the \$2,354 fair market value of the land that was taken.
- Braly-Ramey-Western Mobile Open Space: When Lake 4 at Western Mobile was reconstructed following the 2013 Flood, the outlet pipe was relocated onto adjoining county open space properties. Three new non-exclusive access easements needed to be granted to the St. Vrain and Left Hand Water Conservancy District over the Braly, Ramey, Western Mobile and Western Mobile-Lake 4 properties so the new outlet pipe can be maintained. Because Lake 4 is jointly owned by Boulder County and the water district and because the project was a joint county/water district project, the easements were granted without compensation from the water district.
- Ruth Roberts Park: The City and County of Broomfield manages a trail through the county's Ruth Roberts Park. Broomfield's trail easement needed to be expanded to allow Broomfield to stabilize an area where the trail crosses a drainage. Because the trail serves users of Boulder County's Ruth Roberts Park property, this disposition was done for no compensation.
- Von Reyn: Boulder County's Public Works department took a 0.5-acre portion of this property at the southeast corner of Lookout Road and 95<sup>th</sup> Street so the county could make the east edge of 95<sup>th</sup> Street safer to travel.

## Real Estate Stewardship and Maintenance

Our 2024 stewardship and maintenance of real estate included these typical activities to manage the 'real estate resource' of county open space properties and interests:

- Managing the county's conservation easement program, which encompasses conservation easements and similar restrictions over 1,046 properties and involves these primary tasks:
  - Monitoring several hundred conservation easement properties and resolving violations. In 2024, we monitored 450 properties subject to county-held conservation easements, restrictive covenants, and deed restrictions. (Boulder County currently holds conservation easements and similar restrictions over 885 private properties covering 42,442 acres.)

- Reviewing land use applications over private properties for compliance with conservation easements and other property restrictions that protect open space values.
- Managing 154 conservation easements that the county has granted to city partners over 16,756 acres of county open space.
- Tracking six conservation easements where the county is a backup holder and would step in if the original grantees decide they can no longer hold and manage those easement interests.
- Coordinating the department's response to oil and gas operators' requests for approval to conduct well maintenance activities on county-owned open space, properties subject to county-held conservation easements or similar restrictions, and even private properties not subject to county open space restrictions. This work regarding private properties assists the county's Community Planning & Permitting department in minimizing oil and gas development impacts throughout the county.
- Coordinating with the State of Colorado's Division of Reclamation, Mining and Safety (DRMS) to close hazardous hard-rock mine openings on county open space. DRMS pays half of the closure costs and the county partners to cover the remaining half. Because of this partnership, DRMS can annually address about 20 hazards in the county.
- Ensuring that only allowed uses of open space occur. This includes telling landowners and other members of the public that private use of open space is not allowable.
- Maintaining data about the county's ownership of open space and conducting research to answer questions that facilitate department projects. For example, department colleagues need to know what easements and interests could affect department construction projects.
- Coordinating with county colleagues on matters affecting county open space. For example, the division manager collaborates with the director, the county attorney, and the long-range planning manager and director at Community Planning & Permitting on intergovernmental agreements between Boulder County and its municipalities.
- Responding to inquiries about the county's open space real estate interests and addressing suggestions for new acquisitions. Members of our community call us frequently and very much appreciate our answers to their questions.

---

We look forward to the opportunities that 2025 will present for the county's open space acquisitions and we will continue working with condemning authorities to minimize impacts to county open space.

2024 Open Space Acquisitions																		
#	Closing Date	Property	Dev. Rights Acquired	Dev. Rights Retained by Seller	Acres	Price	Donation Value	Grants	Total Value	Fee	Water Shares/Units	CE Am.	CE Am.	Trail	Other	Land Ofcr	Para-legal	Notes
1	1/2/2024	Highlands Camp	7	1	294.00	\$0	Being Appraised	\$0	TBD			1				TB	MG	Landowner donated CE to Estes Valley Land Trust. Boulder County helped with transaction costs and received a CE backup interest.

## PARKS & OPEN SPACE ADVISORY COMMITTEE MEETING

Time/Date of Meeting: 6:30 p.m., Thursday, Jan. 23, 2025

Location: Boulder County Courthouse  
1325 Pearl Street, Third Floor, Boulder

<b>TO:</b>	Parks & Open Space Advisory Committee
<b>FROM/PRESENTER:</b>	Susan Spaulding, Environmental Resources Element Sr. Specialist, Resource Management Division
<b>AGENDA ITEM:</b>	<b>White-Nose Syndrome in Bats in Boulder County: BCPOS Response and Internal Management</b>
<b>ACTION REQUESTED:</b>	Information Only

White-Nose Syndrome (WNS) is caused by an invasive fungus *Pseudogymnoascus destructans* (Pd). It arrived in North America in 2006, near Albany, New York. The fungus was unknown to science until it was discovered in North America. Since then, researchers have confirmed its presence in Europe and Asia, on bats. However, those bats do not succumb to the effects of the fungus. Unfortunately, our North American bats have been severely impacted by the fungus, to which they have no immunity, with some species experiencing up to 90% declines in population numbers.

The fungus infects the bats and grows on them during the colder, hibernation months. It infiltrates their cellular structure, which eventually cuts off circulation to their extremities, and their skin. This causes the bats to move around, or even to wake up fully, which leads to a depletion of their critical fat stores, that they'd built up to last through the hibernation period. In many cases, the bats will then leave the safety and consistent temperatures of their hibernacula in search of food. In most cases, they therefore freeze or starve.

WNS arrived in Colorado in Spring, 2023 in the southeast corner of the state. In Winter 2024, a little brown bat (*Myotis lucifugus*) tested positive for WNS in Boulder County. In early Spring, 2024, several additional bats (*Myotis lucifugus*, fringed myotis: *Myotis thysanodes*, and big brown bat: *Eptesicus fuscus*) were found dead in Longmont, and near Lyons and tested positive for WNS. This is consistent with patterns seen elsewhere when WNS arrives in an area.

BCPOS has formed an internal WNS Team comprised of several work groups across multiple divisions. Our objectives are to understand WNS as a department and formulate best management practices during this initial wave of WNS, as well as into the future. In the past, we've coordinated on measures to limit disturbance to bat colonies on Open Space, but we've now initiated a formal process to develop department-wide standardized practices. Our goal is to discuss and address management activities that may overlap with

bat habitat to ensure we are considering and protecting bats during this severe challenge to their survival.
