--

We will discuss the Small Grants Program that awards cash grants to researchers to conduct research on open space. This program has been mostly focused on the Resource Management Division, but we are looking at expanding to answer other divisional (Agricultural and Recreation and Facilities) needs. Small grant topics are generated each year based on research questions that our committee would like to see answered. During this presentation we will discuss and highlight a few examples of research that we have completed and how we have used the results in management decisions or to shape our management actions.
