

RESOLUTION 2025-043

A resolution adopting the 2025 Boulder County Road Map

Recitals

A. Section 43-2-110, C.R.S., requires Colorado counties to prepare and adopt a map showing a primary and secondary road system through a public hearing.

B. The Board of County Commissioners of Boulder County (the “Board”) adopted an official Road Map of Boulder County on December 15, 1953, which has been subsequently amended, most recently in 2018.

C. The Board desires to amend the official County Road Map to incorporate changes in functional classification, newly identified public roads, removal of annexed roads, and road names and numbers. All such changes have occurred prior to May 2025. The County further desires to remove snow removal priority from the Road map and instead make it available online at <https://bouldercounty.gov/transportation/road-maintenance/snow-removal/>.

D. On August 26, 2025, the Board held a duly noticed public hearing on the adoption (the “Public Hearing”).

E. Based on the Public Hearing, the Board finds that the roads designated on the map attached hereto as **Exhibit B** constitute an integrated system of a County Primary Network of high priority and a County Secondary Network for which the Board assumes responsibility with lesser priority.

Therefore, the Board resolves:

1. The County Road Map with amendments reflected in **Exhibit A** is approved, effective as of May 2025.
2. The Public Works Department is hereby directed to prepare a new official County Road Map, incorporating the changes reflected in **Exhibit A**.

A motion to approve the Docket was made by Commissioner Ashley Stolzmann, seconded by Commissioner Marta Loachamin, and passed by a 3-0 vote.

[Signature Page to Follow]

ADOPTED as a final decision of the Board on this 26th day of August, 2025.

The signatures below indicate approval of the text of the Resolution but are not necessarily reflective of the votes taken at the Public Hearing.

**BOARD OF COUNTY COMMISSIONERS
OF BOULDER COUNTY:**

Marta Loachamin, Chair

Claire Levy, Vice Chair

Ashley Stolzmann, Commissioner

ATTEST:

Clerk to the Board

Public Works Department

TO: Board of County Commissioners
FROM: Steve Durian, Public Works Director
DATE: August 26, 2025
SUBJECT: Road Map Adoption

Action requested: Board of County Commissioners adoption of the 2025 Road Map

BACKGROUND

Boulder County has maintained a Road Map since 1953, as required by [Colorado Revised Statute 43-2-110](#). At its inception, the Road Map provided a graphic record of the primary and secondary road systems including an official record of the location and type of roadways throughout the County. The map has since evolved into the single official record of the County's roadway system that, because it is officially adopted by resolution, provides an authoritative source of ownership, use and maintenance of the county road network. The Road Map contains two elements: the map itself which shows the location, functional class and spatial alignment of each road segment, and the Road Directory which lists detailed information about each road segment.

Information for the 2025 Road Map, including an interactive web map, can be found online at <https://bouldercounty.gov/transportation/maps/roadmap/>.

PROPOSED CHANGES FOR THE 2025 ROAD MAP

Since the publication of the 2018 Road Map, the Public Works Department has continued to reconcile the Road Directory both with official documentation of road status, ownership and classification and also with the factual dimensions of county roads out in the field. Proposed changes for the 2025 Road Map include: newly identified publicly owned roads, removed roads, changes to road names and/or road numbers, road lengths, and surface type changes. In many cases, a road will undergo a name change, change in road number, and change in maintenance, and/or road classification with a single action such as an annexation. In these cases the affected road appears multiple times in the various categories of changes. Further, the 2025 Road Map will not include the Snow Removal Priority. Rather, snow removal is now available on a dynamic web map: <https://bouldercounty.gov/transportation/road-maintenance/snow-removal/>. The "SNOW REMOVAL PRIORITY" will be removed from the Road Maintenance description and the "SNOW REMOVAL" column will be removed from the back of the map.

Finally, the significance of the road classifications for many subdivisions with paved roads has changed since the 2018 update. Prior to about 2020 the Road Maintenance Division conducted significant, periodic maintenance on Residential Collector roads (previously described as Community Use Roads). In recent years as the fund balance of the Road Maintenance fund declined, Public Works leadership reduced the maintenance priority of Residential Collectors and that limited funding would be reserved for roads outside of subdivisions. These Residential Collector roads

would instead be included as a maintenance cost responsibility of any public improvement district (PID) that would be formed for the purpose of subdivision paving. Since the 2018 update several residents of these subdivisions have requested that roads classified as Local be changed to Residential Collector and that the County commit to funding existing Residential Collector roads. Staff reviewed the requests to change Local to Residential Collector roads based on the technical merits defined by county roadway design standards and found in each case that the prior classifications of Local were still appropriate for the roads in question regardless of the source of funding that would be used to maintain them.

Road Surface Type Changes – Table 1

Two roads were changed from gravel to asphalt (paved) since the publication of the 2018 Road Map. Fifteen records were updated to separate paved sections of roads which were included in adjacent gravel road segments on previous road maps.

Road Alignment and Length Changes – Table 2

Nine records on the proposed 2025 Road Map represent small road alignment changes, resulting in minor road length updates. Thirty-two records represent roads where the length has been updated due to annexations or public road research and one correction. Several records were separated to account for paved segments previously grouped with adjacent gravel segments. Five sets of road records were combined due to common attributes, saving space on the Road Directory.

Road Name Changes – Table 3

Road names for six road directory listings were updated from the 2018 Road Map, five of which were incorrectly spelled according to historic records. The fifth road, “W SKYLINE DR” was a road name update in coordination with local property owners.

County Road Number Changes – Table 4

Three road segments with county road numbers are public based on research by Public Works staff. Ten roads were annexed, and as a result, the county road numbers were dropped. Five road segments had incorrect county road numbers according to research by the Public Works staff. Table 3 provides a detailed list of changes to road numbers.

Road Functional Class Changes – Table 5

The proposed 2025 Road Map contains 29 roads that were not included on the 2018 Road Map. These segments of new public roads are relatively small and consist primarily of long-existing road segments that have been identified as public roads but were omitted from previous maps. No functional class *changes* are proposed on any road. Nine records were removed for roads that, based on research, are not public and therefore, the functional class was removed. Eighteen records were removed due to annexations where functional classes were removed as well.

Road Additions and Removals – Table 6

The proposed 2025 Road Map contains 29 roads that were not included on the 2018 Road Map as well as 27 roads removed due to annexation and further research. The additional segments of new public roads are relatively small and consist primarily of long-existing road segments that have been identified as public roads but were omitted from previous maps.

Road Maintenance Changes – Table 7

Nine records where roads were maintained by Boulder County were removed from the Road Map due to annexations. Three short road segments were incorrectly identified as maintained. A few roads were changed to reflect maintenance being performed by the City of Longmont, per agreement.

Accessibility

The Road Map, both printed version and online interactive web map, went through extensive scrutiny under the standards and parameters of Colorado's accessibility laws, HB21-1110 and Senate Bill 23-244.

Action requested: The Public Works Department recommends that the Board of County Commissioners approve the update to the 2025 Road Map and road directory and designate the new version as the official Boulder County Road Map.
